

Nihal Desai, PharmD
Medical Science Liaison with Averitas

You're Invited! Join us for an interactive, non-promotional, educational program that will provide an overview of painful diabetic peripheral neuropathy (PDPN) and the clinical evidence supporting the utilization of high concentration capsaicin to treat PDPN.

Program Highlights

Overview of PDPN

- Disease state
- Underlying pathophysiology
- Current treatment options

High-Concentration Capsaicin Topical System Deep Dive

- Delivery system and matrix technology
- Mechanism of Action: Chemoneurolysis of epidermal nerve fibers

Review of Key Clinical Evidence

- Efficacy data from pivotal clinical trials
- Real-world outcomes
- Safety & tolerability profile

This program is not eligible for CME credit and is funded by the Medical Affairs division of Averitas Pharma solely for non-promotional education of health-care professionals. Any food/beverage received is reportable under applicable Open Payments/State Transparency Laws.
